PROFESSIONAL SUMMARY

Passionate and skilled Front-End Web Developer holding a Technical Diploma in Computer Science from the Syrian Virtual University (SVU). Highly proficient in modern web development technologies including HTML5, CSS3, JavaScript (ES6+), and React.js with Vite, alongside PHP and database management systems. Proven track record as a Freelance Front-End Developer in building dynamic, responsive web applications, e-commerce storefronts, and specialized restaurant solutions such as Crunchy Bites featuring an interactive admin dashboard and WhatsApp API integration. Strong foundation in databases, networking, cybersecurity, and WordPress, eager to contribute to collaborative, growth-oriented professional teams.

TECHNICAL SKILLS

- **Front-End Technologies:** HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, UI/UX Implementation
- **Frameworks & Libraries:** React.js, Vite, PHP, Component-Based Architecture
- **Version Control & Tools:** Git, GitHub (Repository Management, Hosting, Deployment, Collaboration)
- **Databases:** SQL Server, MySQL
- **Systems & Cybersecurity:** Windows Server, Windows, Kali Linux, Networking Fundamentals, Cybersecurity Specialization
- **CMS:** WordPress

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer — 2023 - Present

- Architected and developed custom, responsive client web applications using React.js, JavaScript, PHP, and HTML5/CSS3.
- Optimized site speed, UI/UX interaction standards, and cross-browser responsiveness across all screen sizes.
- Integrated front-end views with backend database endpoints and third-party APIs including instant messaging services.

Sales Supervisor - Shoe Retail Store — 2023

- Supervised daily retail store operations, managed floor staff, organized inventory, and handled customer relations.

Cashier - Restaurant — 2022

- Managed daily POS register operations, cash handling, transaction reconciliations, and direct customer care.

Warehouse Supervisor - Kabbour Facility — 2019

- Supervised warehouse logistics, inventory tracking, stock movements, and storage organization.

PROJECTS & WEB APPLICATIONS

Restaurant Ordering App (Crunchy Bites) - React (Live Project) crunchy-bites.pages.dev

- Engineered a full web app using React and Vite, featuring a real-time interactive cart, direct WhatsApp order placement, and a custom Admin Dashboard to manage and update food menus dynamically.

Syria TIC Electronics Store (PHP Platform)

- Designed and developed a complete tech electronics e-commerce interface built on PHP with an integrated admin backend panel for inventory management.

Responsive E-Commerce Storefront

- Built a modern, multi-device compatible storefront layout using semantic HTML5 and custom CSS3 styling.

Personal Developer Portfolio

- Designed and launched a personal developer portfolio showcasing recent frontend web engineering projects.
